The **Turbocharger Analyser Pro v2** is an innovative device for balancing turbochargers. Modern design, technological innovation and simplicity of operation make the difference of this equipment which is an important reference.

The **TCA Pro v2** analyses the balance of turbochargers and allows them to work again with the original values.

The software is entirely new, having been designed exclusively for the **TCA Pro v2**. It is completely adapted to the needs of users and extremely intuitive and easy to use.

Technical Data:

- ✓ Test speeds over 300.000 RPM
- ✓ Oil tank: 7 liters
- ✓ Air pressure: 8 bars minimum / 10 bars maximum
- ✓ 230 volt supply

Advantages:

- ✓ Allows for automatic or manual testing
- ✓ Creates PDF reports (sent by e-mail or to a printer)
- ✓ Ample and well lit work area (low consumption LED lighting)
- ✓ Automatic arm
- ✓ Automatic door
