

WE STAY FOCUSED, WE INNOVATE AND WE HAVE YOUR NEEDS IN MIND!

SO LET US INTRODUCE YOU TO OUR *NEW FUNCTIONS*

With this function it is now possible to automatically adjust the minimum and maximum flow of turbochargers with programmable electronic actuators.

Automatic Adjustment of Turbochargers with Electronic Actuators

Until the present it was possible to adjust turbochargers variable nozzles with pneumatic or electronic actuators, according to the values of OEM turbochargers. Now, with optimized values, by selecting the type of nozzle ring, we can ensure the best efficiency of the turbocharger.

Optimized value for best efficiency

With continuous vacuum we save you time.

Simplified Vacuum Adjustment

REQUIREMENTS

Valid annual subscription
+
Actuator Programmer

Get your requirements valid until the end of **November** and get this function **free of charge!**

Made to be simple, and made to be faster!
